All FS, WTT, WTB threads are subject to the specific rules outlined in their respective subforum. To start viewing messages,I've seen bits of it floating around the net before, but its all together here. From day one everyone I have dealt with has gone above and beyond to help me from explaining products, checking order status, and today was Corey finding me a part simply from a description on the phone. Curtis has been so generous with his extensive knowledge, and being new to the karting world I cant begin to tell you how lucky I feel to have found Acceleration. I have bragged on you and your shop to everyone I meet, and will be sending anyone and everyone to you for ALL their karting needs. I never write reviews, but Acceleration has inspired me to take the time to congratulate and thank you for offering a rare commodity in a sea of mediocrity real people who care about their customers and their industry. I have ordered items from you 4 times and every single time you're as fast as the previous order. I really want to pass on how great the experience was.

<http://www.drupalitalia.org/node/69934>

We were in a slight time crunch, not to mention that I really wanted to get the best equipment possible. So we got the kart on time, completely put together, and ready for the track. This was completely unexpected, and a great surprise. Not to mention, Holden found a way to save me money

which in this sport, every dime saved is a bonus. So we got the kart, my kid slipped in the seat and he fit perfectly. Seat size and location was ideal. Holden always exhibited the highest level of professionalism. Next year, I have to buy 2 cadet karts. Bottom line, unless something magical happens, I will be dealing with Holden next year buying my 2 cadet karts. You always seem to have time to answer my questions, even tech related questions, more so than some local dealers. I've ordered all of our parts and a helmet exclusively from AKR this off season for my sons new kart. Everything is always shipped so quickly and without any issues. I went from a newbie last year with a 20 year old kart to now being able to hit podiums on the local levels on a newer and much more competitive CR125; you guys have been instrumental in helping me with my progression and journey. It is a great pleasure to find a company like yours that value customer service. The few times I called in, the experience was great. The orders I placed were filled and shipped the same day. You have gained a customer for life, I will always order my karting supplies from you. You truly stand by the products you sell, which I am grateful for. Thank you for replacing the defective battery with a new one. Wrecking my kart a few weeks ago I was really bummed. So getting a new rolling chassis is pretty exciting. He was amazing and provided all the information that I needed to make the decision to purchase the helmet. And everything fits perfectly. Raymond has answered so many of my questions in a world I know nothing about. Great company! Top Notch Customer Service.

What's A called Should I screw them in completely Play with the idle screw so that when cold the engine should idle around 2,500 rpm, when hot it may not idle at all without a little throttle that is fine. Is it normal for the wheels to spin quite quickly I'm doing it on a trolley. Continue reading Unsubscribing is possible at any time. Since the beginning our maxim is a service from scooterist to scooterist and nothing is impossible. In order to get the weather values, the application can use the GPS to obtain the position and altitude, and the network connection to get the temperature, pressure and humidity from the nearest weather station. Nevertheless, the application can run without GPS and internet connection, in this case, the user has to give the weather data. The application is made up of four tabs that are described next Results in this tab, the recommended main jet, needle position, air density and spark plug type values are shown.

This data are calculated depending on the weather conditions and the engine configuration given in

the next tabs. In addition, this tab lets to make a fine tuning adjustment to adapt to a concrete engine. Weather you can set the values for current temperature, altitude, pressure and humidity. The application works with different measure units inHg, mb, mmHg, hPa, atm for pressure, C and F for temperature. The app is NOT VALID for Rotax Max engines before 2015. For these engines, you should install Jetting Max Kart. The model is adjusted a bit to adapt it to the changes that occur every year in cylinders, etc. Solves bug in dark mode. Fixes some minor user interface bugs. Or call 08006927753.
